

CompuLaw® **Vision™**

*The Leading Calendar and  
Matter Management System*

## **Now, the latest rules—installed faster and easier than ever.**

Keeping your firm protected with the most up-to-date court rules and resulting critical dates just got even easier. With just a few clicks of the mouse, it's all possible—and it's all waiting for you—right now.

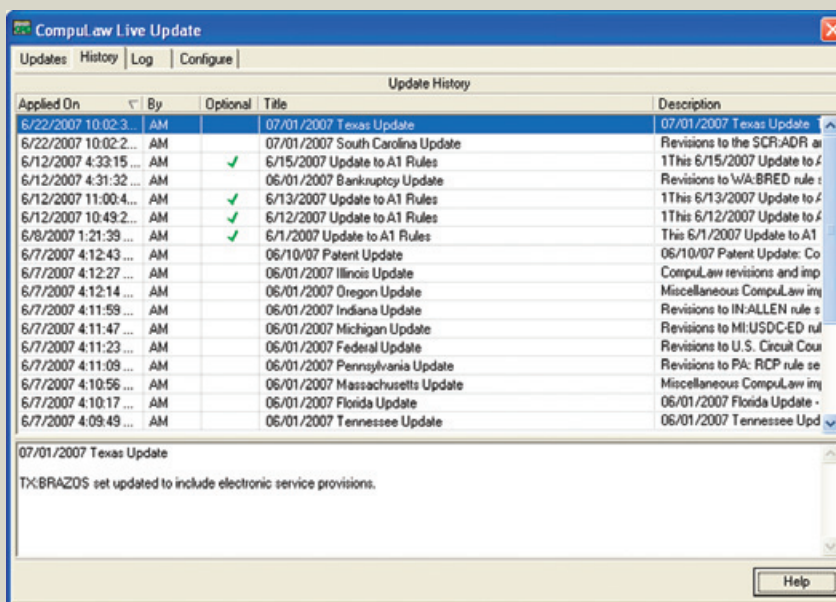

New CompuLaw Live Update replaces the old snail mail delivery of disks with an automated court rules management tool right on your Vision calendar/docket software desktop.

Just as soon as new updates are posted by CompuLaw, a pop up from your status bar will alert you. Click on the pop up and you're ready to immediately apply the update (and any others you need) in the correct order. It's fast, it's simple, and it's available today.

## CompuLaw Live Update includes these new and exciting benefits:

- The comfort of knowing you always have access to the latest rules updates.
- Faster, quicker and easier installation of court rules updates.
- Immediate notification from within Vision of rule updates that your firm needs.
- An auto-management tool that automatically identifies updates, downloads them from “behind the scenes” and then sends you an email notification once they are ready to be installed.
- Live Update automatically checks for and downloads rule updates on a schedule of your choosing. Set a convenient time to check for updates and have the program check as often as you wish.
- Ability to view a list of rule updates and apply them from within Vision without having to use the Maintenance Module.
- No more CDs or diskettes. No chance of hassles with damaged CD media or access code diskettes.
- Your updates are always applied in the correct order. You no longer have to worry that you might not have applied an update or that the same update has already been installed.
- A complete history of applied updates, including details. You can even control how long to retain your history information.

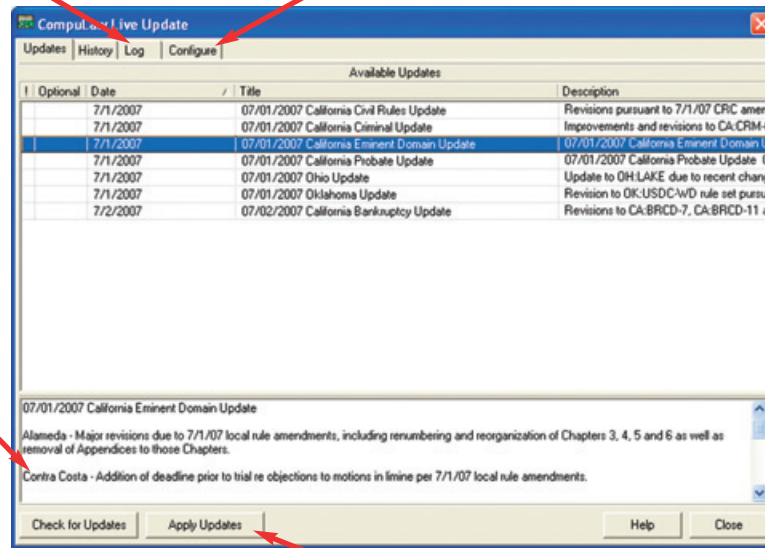

*New Vision Live Update automatically notifies you of the rule updates that your firm needs!*

- No shipping and handling charges when you use CompuLaw Live Update and cancel CD deliveries. Save money!
- A quick fix for the occasional “optional” rules update. These updates are clearly indicated as such and can be removed from your update list.
- Event logging that features a complete list of your downloads and updates. This log is tracked and can be referred to in the event of an error, or if you just want to see the last time Live Update checked for rules updates. You control how long to keep your log information.
- Environmental consciousness—no wasted CDs, disks and mail travel.

# INTRODUCING COMPU LAW LIVE UPDATE™

History and Log records kept of all download and installation activity.

Set one or more email addresses to be notified when rule updates are ready.

Detailed information of what is included on each rule update.

Ensures updates are applied in correct order.

**CompuLaw Live Update is available with the CompuLaw Vision version 9.5 software upgrade.** In addition to Live Update, 9.5 offers even more new features that to help automate and improve your docketing and calendaring functions. For example, the new Rules Verification Report shows you a list of out of date rules in a matter of seconds. You'll also be able to stay informed about the latest product offerings available to you from CompuLaw, compare features with the product you're using now and keep your technology current.

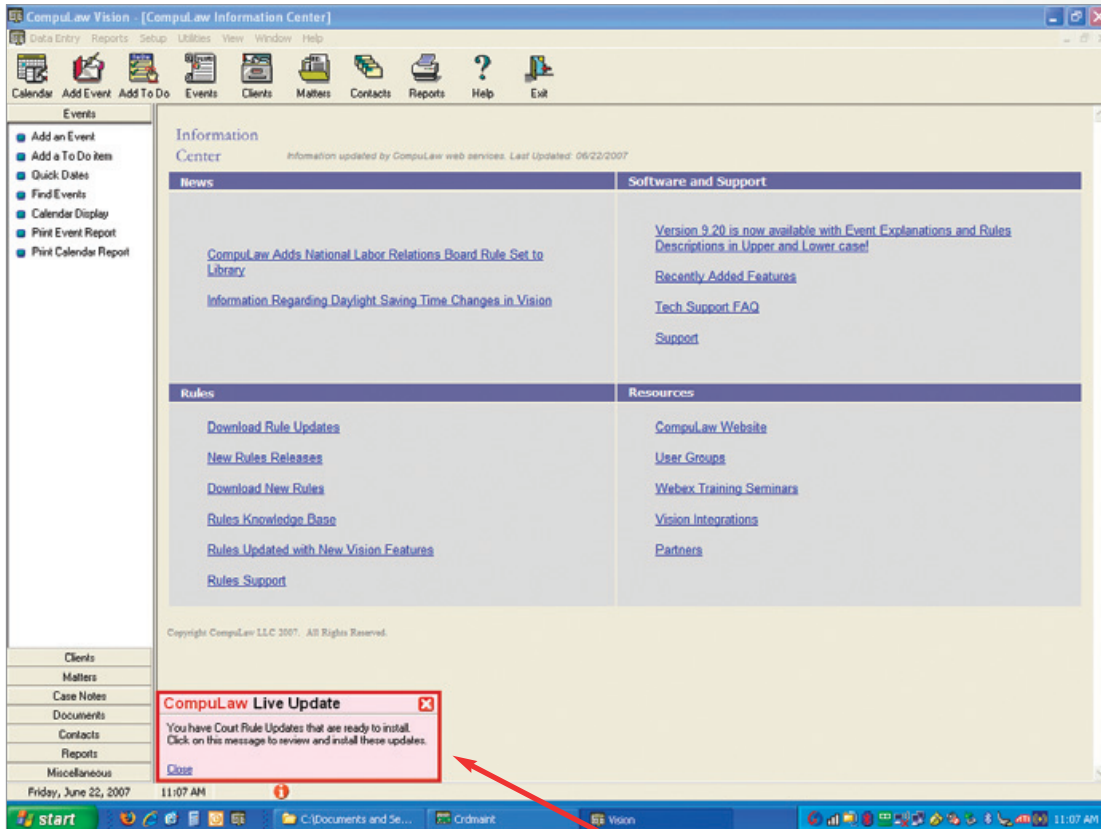

**WARNING: The rules listed below are out-of-date and should no longer be used. Please contact CompuLaw with the details provided below.**
